

Jerry Manavalan

Associate, Senior Electrical Engineer

About

Jerry is a great asset to our electrical engineering department. With each project, he adds to his knowledge base and builds experience to handle the next set of project challenges. He has an acute sense of how electrical and building systems must function, as well as how occupants function within a building. This knowledge is applied to each and every project for a more successful end result.

Jerry's responsibilities at the firm consist of conducting site surveys of electrical systems and electrical systems design of multi-faceted projects. Additionally, he makes equipment selection decisions and coordinates his work with that of the other engineering disciplines.
