

St. George's School

Townhouses

Location	Middletown, Rhode Island	Size	approx. 2,250 sf (each unit)
Architect	Voith & Mactavish Architects	Cost	N/A
Services	MEP/FP	Completed	2022

Kohler Ronan had the pleasure of providing mechanical, electrical, plumbing, and fire protection designs for the new townhouses at St. George's School. The project scope involved the construction of a series of townhouses, each with three, 2,250 square-foot residential units.

The intention of the initial construction was to provide temporary student housing while existing student dormitories were renovated. At the conclusion of the on campus dormitory renovation, the townhouses were converted to faculty residences. While the conversion of the townhouses to faculty housing was not included in the scope of work, the designs of each trade was evaluated and considered for this future conversion.
