<b>Architect</b>	Spagnolo Gisness Architects	<b>Cost</b>	\$27 million
<b>Services</b>	MEP/FP	<b>Completed</b>	2011

---

With headquarters just outside of Paris, France, Alstom is a world leader in power generation and rail infrastructure. It is perhaps best known for the manufacture of high speed trains such as AGV, TGV, and the Eurostar series. The multinational conglomerate provides integrated power solutions for energy resources including hydro, nuclear, gas, steam, as well as wind. The corporation employs 80,000+ people in 70 countries.

To accommodate the company's growth, Alstom recently embarked on a plan to create an improved campus at its Windsor location. The scope of the project incorporated a 350,000-square foot renovation consisting of office space, lab space, conference facilities, cafeteria and kitchen facilities, telecommunication facilities, and fitness center. Sustainable design elements were implemented where appropriate.

Kohler Ronan's designs consisted of mechanical, electrical, plumbing, and fire protection systems for a typical core and shell design. In a subsequent contract, we provided complete MEP/FP systems for a comprehensive office fit-out.
